ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite):

A site visit by the NRCS indicated that the wetland in question has formed in an abandon gravel pit located outside of the floodplain with no evidence of a confined flow connecting it to waters of the United States. Due to the limited size of the wetland it appears to have no interstate commerce value.
